

DECREASE IN OPERATIONAL EXPENDITURE OF TRANSPORT LOGISTICS

PROJECT DESCRIPTION

The project has helped an exporter of grain products organize efficient logistics from Russian regions to Iran, adding competitive advantage to traders by decreasing OPEX.

SCOPE

- Evaluation of cargo flow from rural areas in Central and Volga-river regions of Russia to Iranian customers through Caspian ports.
- Finding bottlenecks and crucial factor infusing logistics efficiency.
- Development of solutions aimed to increase operational efficiency of transport logistics.
- Assisting a client with reorganization of operational processes.

PROJECT BENEFITS

- Improvement of client's strategic position
- Decline in OPEX
